February 7, 2022

Dear Membership,

Water Update:

As of today, February 7, 2022, the water leak that was detected in the area of Unit 83 has been temporarily corrected. Water valves and pumps are fully functioning and the water has been restored to the park.

The road is going to have a temporary fill and the area will be blocked off until the spring when additional work can be done. The freeze and the condition of the underground pipes need the area to be revisited.

The road can be used, just proceed with caution in that area.

Thank you

Board of Directors

Ron Vecchia
